Quality Assisted Living in a Homelike Setting

## SIZE MATTERS

At least when choosing an assisted living facility. At BeeHive Homes of Crownridge, our community is limited to 16 residents which we feel is ideal. We are big enough to be licensed and regulated by the State of Texas and provide our residents with a healthy amount of socialization yet small enough to offer a more flexible family-friendly assisted living experience for our residents and their families.

Recent news reports have stated that smaller is better when it comes to assisted living facilities because we are safer and better equipped to manage and control infectious disease compared to large "big box" facilities. As a small property, we are aware at all times of who's coming in and out of our home.

Our floor plan is designed to flow and feel like a home rather than a hotel so our kitchen and dining room are open and inviting and resident rooms are just down the short hallway from our common living areas.

If you or a loved one is in need of quality assisted living in the San Antonio area, please give us a call. To learn more about us, please visit our website at [www. BeeHiveSanAntonio.com](http://www.BeeHiveSanAntonio.com)
